

# West London Mental Health Trust Performance in Initiating Q3 15/16

Research Ethics Committee Reference Number	Name of Trial	Date of Receipt of Valid Research Application	Date of NHS Permission	First Patient Recruited?	Date of First Patient Recruited	Duration between VRA and NHS Permission	Duration between NHS Permission and First Patient	Duration between VRA and First Patient	Benchmark Met	Comments	Reasons for delay correspond to:
92737/LNW	CIRCLE	06/01/2015	13/01/2015	Yes	30/01/2015	7	17	24	Yes		Unknown
136836/LNW	CBT vs Standardised Medical Care to treat Dissociative Seizures - CODES	23/01/2015	10/02/2015	Yes	09/04/2015	18	58	76	No	This study has a target of 10 recruits over 1114 recruiting days - that's an average of 1 recruit every 111.4 days, as a consequence it seems unreasonable to have a 70 day target for a first recruit.	Neither
151131/LNW	AFFECT Trial	05/01/2015	09/01/2015	No		4			No	We have screened 6 people for the AFFECT study, unfortunately none have been suitable for the study. This is a national problem with the study and well-known by the coordinating centre. The protocol has been amended in an attempt to boost recruitment.	NHS Provider
117466/LNW	Minocycline in Alzheimer's Disease Efficacy (MADE) trial	30/12/2014	26/01/2015	Yes	21/05/2015	27	115	142	No	This study is difficult to recruit to. We screened multiple patients within the 70 day period for this trial, but in that period either the screening failed, or they were still being screened.	NHS Provider
157696/LNW	Effective Home Support Dementia Care:Patterns of Current Provision v1	09/04/2015	14/04/2015	Yes - Date Unavailable		5			No	Study involves a phone call to one member of staff for information, hence not a lot of recruitment information.	Neither
137856/LNW	Screening Antipsychotic-Induced Movement Disorders	09/02/2015	10/02/2015	Yes - Date Unavailable		1			No	Unable to get in contact with PI	Unknown

150835/LNW	DEME 3598 - STARBRIGHT Randomised, double blind, parallel-group, placebo-controlled study of Lu AE58054 in patients with mild moderate Alzheimer's disease treated with an acetylcholinesterase inhibitor; study 3	01/05/2015	05/05/2015	Yes	18/08/2015	4	105	109	No		Unknown
155550/LNW	European Long-acting Antipsychotics in Schizophrenia Trial: EULAST	15/09/2015	17/09/2015	No		2			No	We have extensively publicised the study within WLMHT and are continually working with clinicians and the LCRN staff to encourage referrals and embed research within the culture and working practice of all clinicians in the trust. We are now considering an incentive for clinicians who refer appropriate patients	Unknown
161812/LNW	A 24-month, Multicenter, Randomized, Double-blind, Placebo-controlled, Parallel-group, Efficacy, Safety, Tolerability, Biomarker, and Pharmacokinetic Study of AZD3293 in Early Alzheimer's Disease (The AMARANTH Study)	06/07/2015	07/07/2015	No		1			No	Many of the patients seen gave consent to participate in the trial but screen failed on inclusion/exclusion criteria. We are also still awaiting an SSA exemption for using the contracted PET imaging centre which has thus delayed the screening procedures and further delaying the speed at which patients will be recruited into the study.	Neither
